

Stress Relieve

Metcor operates several furnaces for parts that require the stress relieve process. This process reduces the tensions in parts that have been welded or machined.

Stress Relieve Furnace

Our largest furnace is 15' (4.5m) x 10' (3 m) x 9' (2.7 m). This large surface area is uniform within +/- 15°F and is heated with natural gaz.

Control Systems

Our state of the art automated control system can provide any heating or cooling rate.
